ANNEX 5 TO THE SCHEME

PART 1 - THE COUNCIL'S GENERAL PLAN FOR APPLYING ITS SHARE OF THE PROCEEDS OF THIS SCHEME DURING THE OPENING TEN YEAR PERIOD

It is proposed that the Scheme will commence no earlier than 27th February 2023 and this general plan covers the ten year period running from the commencement date of the Scheme with particular reference to the early part of this period.

The revenue generated by the Scheme will in the first place be used to cover the cost of operation, including the maintenance of cameras, operational staff etc. It is not intended that the Scheme should generate substantial net proceeds after covering these costs. Government policy is that the level of any charges should not be set as a revenue raising measure and the purpose of the Scheme is not to generate revenue but to encourage improved air quality. The more vehicles that are compliant with the Scheme, the less revenue the Scheme will generate.

In the event that net proceeds are generated from the Scheme over the opening ten year period, these proceeds would be applied, in such proportions as may be decided by the Council, to directly or indirectly facilitate the achievement of relevant local transport policies in Sheffield's Transport Strategy and the Sheffield City Region Transport Strategy in accordance with the following high level spending objectives:

- supporting the delivery of the ambitions of the Scheme and promoting cleaner air;
- supporting active travel and public transport use;
- supporting zero emission and sustainable infrastructure and actions in and around the city to improve air quality.

PART 2 - THE COUNCIL'S DETAILED PROGRAMME FOR APPLYING ITS SHARE OF THE PROCEEDS OF THIS SCHEME DURING THE OPENING FIVE YEAR PERIOD

The Council's detailed programme for applying any net proceeds during this period will depend to a great extent on:

- the level of net proceeds generated;
- how quickly compliance with Scheme standards will be achieved across the various sectors and therefore which sectors will still require support to meet those standards;
- to what extent the proposed improvements have already been implemented by other means;
- how long the Scheme stays in place and when compliance with relevant air quality standards will be achieved.

Given these uncertainties the Council will consider and prioritise how the net proceeds of the scheme will be used to deliver additional schemes, interventions and/or policies in

line with the strategies and objectives in Part 1, and these would potentially include but would not be limited to:

- supporting and enhancing the public transport network, through the delivery of infrastructure improvements and complementary initiatives, facilities and services that support increased use of public transport;
- enhancing the existing walking and cycling network, and complementary initiatives and facilities that support Active Travel;
- maintaining and enhancing the public electric vehicle charge point network, and other schemes and initiatives that support the uptake and use of zero emission vehicles;
- car parking projects and policies to manage demand for travel by car through availability, pricing and/or restrictions.
- enhancing the non-charging measures already being funded by the Government's Implementation Fund and Clean Air Fund;
- enhancing the monitoring and evaluation of the Scheme;
- providing schemes to reduce the impact of vehicles on the health and wellbeing of residents and visitors; and

related research and policy development.
