

Representation on the Sheffield Plan Publication (Pre-Submission) Draft

Respondent details

Comment ID number: PDSP.127.001

What is your Name: Sheffield and Rotherham Wildlife Trust

If you are making this representation as a member of an organisation, what is the name of your organisation:

Sheffield and Rotherham Wildlife Trust

If you or your organisation are making a representation on behalf of another person, organisation or group, please tell us who it is and its role:

N/A

Document

Which document to you wish to make a representation on:

Part 1: Vision, Spatial Strategy, Sub-Area Policies and Site Allocations

Which section of the document is your representation on:

Chapter 2: Vision, Aims, and Objectives

Which paragraph/site/map layer of the document is representation on:

N/A

Representation

Do you consider the Local Plan is legally compliant: Yes

Do you consider the Local Plan is sound: No

Do you consider the Local Plan complies with the duty to co-operate: Yes

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to co-operate:

Objectives for a Green City

We support the overall objectives for a Green City but some of the wording in this section is not strong enough to meet the expectations of NPPF 174, 175, 179 and 182 and Government ambitions and targets for nature restoration and recovery. It also does not reflect adequately the recognition that there is a nature emergency in Sheffield that has to party addressed though the planning system. This is reflected in the Sheffield City Council Motion 'Action on the Nature Emergency' that was passed 16.6.21 which says "(i) acknowledges the likely challenged to projects within the NEAP from developers under the current national guidelines which severely constrain proper consideration of the Climate and Ecological Emergency and for this

reason it is imperative that this Council develops robust policies in the Local Plan which can help to protect and enhance biodiversity.” (NEAP = Nature Emergency Action Plan). The current wording does also not recognise that nature plays a significant role in climate change adaptation (see definition on p65 of the NPPF) as well as mitigation.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above:

Suggested minor modifications to wording as follows:

“To safeguard and restore Sheffield’s unique natural landscape setting....

In order to:

‘Protect existing biodiversity and measurably contribute to nature’s recovery’ and

‘Contribute to both climate change mitigation and adaptation’

To contribute to NPPF 174, 175, 179 and 182 and Government ambitions and targets for nature restoration and recovery

If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s):

No, I do not wish to participate in hearing session(s)

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

N/A

Representation on the Sheffield Plan Publication (Pre-Submission) Draft

What is your Name: Sheffield and Rotherham Wildlife Trust

If you are making this representation as a member of an organisation, what is the name of your organisation:

Sheffield and Rotherham Wildlife Trust

If you or your organisation are making a representation on behalf of another person, organisation or group, please tell us who it is and its role:

N/A

Document

Which document to you wish to make a representation on:

Part 1: Vision, Spatial Strategy, Sub-Area Policies and Site Allocations

Which section of the document is your representation on:

Chapter 3: Growth Plan and Spatial Strategy

Which paragraph/site/map layer of the document is representation on:

N/A

Representation

Do you consider the Local Plan is legally compliant: Yes

Do you consider the Local Plan is sound: No

Do you consider the Local Plan complies with the duty to co-operate: Yes

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to co-operate:

The following paragraph is unsound.

“The Sheffield Plan will deliver:

l) Protection, management and enhancement of designated blue and green infrastructure sites and assets. With a focus on the Green Network (including the Local Nature Recovery Network) and designated Urban Greenspace Zones (see policies GS1 to GS11)”

The definition of the ‘Green Network’ refers to Map 17 however Map 17 is not a Green Network map, it is simply a map of existing green spaces and ecologically designated sites. Neither is it a green infrastructure map or network or strategy and does not show any opportunities for improving or strengthening any networks.

This needs to be improved in line with the newly launched Natural England Green Infrastructure Framework and does not meet the requirement of para20 of the NPPF “Strategic policies should set out an overall strategy for the pattern, scale and design quality of places, and make sufficient provision for: d) conservation and enhancement of the natural, built and historic environment including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation”

Green infrastructure is also included in Para92c) and 154a), 186 and 175 (see below)

Definition on p67 of the NPPF “Green infrastructure: A network of multi-functional green and blue spaces and other natural features, urban and rural, which is capable of delivering a wide range of environmental, economic, health and wellbeing benefits for nature, climate, local and wider communities and prosperity.”

A South Yorkshire Green Infrastructure Strategy was produced in 2011 but this has not been referred to, or updated, and a local Sheffield version has not been produced following the guidance in the Natural England GI Framework

<https://designatedsites.naturalengland.org.uk/GreenInfrastructure/Principles/HowPrinciples.aspx>

and or the Building with Nature Standards for Local Plan policies

<https://www.buildingwithnature.org.uk/planners>

<https://www.buildingwithnature.org.uk/project-list-blog/2022/9/29/west-dunbartonshire-council-local-development-plan-2?rq=policy>

Neither does the map and accompanying policy make reference to the ‘Access to Nature – capacity and demand maps’ which were developed as part of the South Yorkshire Natural Capital Maps (‘Holt, A.R., Zini, V. & Ashby, M. (2021) South Yorkshire natural capital and biodiversity mapping, Natural Capital Solutions Ltd, July 2021’). This is the most up to date and best quality evidence we have for access to nature and it not referenced.

Also Map 17 does not include the Nature Recovery Network – this need to be separate. Justification – separation of ecological networks and their components to fully satisfy NPPF policies 174/175/179

“174 Planning policies and decision should contribute to and enhance the natural and local environment by:

d) minimising impacts on and providing net gains for biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures.

175. Plans should: distinguish between the hierarchy of international, national and locally designated sites, allocate land with the least environmental or amenity value, where consistent with other policies in this Framework, take a strategic approach to maintaining and enhancing networks of habitats and green infrastructure; and plan for the enhancement of natural capital at a catchment or landscape scale across local authority boundaries.

179. To protect and enhance biodiversity and geodiversity, plans should:

a) Identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity⁶¹ ; wildlife corridors and stepping stones that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation⁶² ; and b) promote the conservation, restoration and enhancement of priority habitats, ecological networks

and the protection and recovery of priority species; and identify and pursue opportunities for securing measurable net gains for biodiversity.

62Where areas that are part of the Nature Recovery Network are identified in plans, it may be appropriate to specify the types of development that may be suitable within them.”

We know that the Nature Recovery Network Maps (created from ‘Holt, A.R., Zini, V. & Ashby, M. (2021) South Yorkshire natural capital and biodiversity mapping, Natural Capital Solutions Ltd, July 2021.) are currently under the ownership of the South Yorkshire Mayoral Combined Authority and have not yet been made available in the public domain and therefore this is partly a matter of timing. Ideally these would be submitted with this draft plan to the Planning Inspector in July 2023 with a Supplementary Planning Document (SPD) to follow. However if this is not possible, the maps may also need to follow with the SPD. Nature Recovery Network maps are referred to in Part 2 (8) but there needs to be consistency about reference to maps and strategies in Parts 1 and 2.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above:

Suggested minor modifications

- “1) Protection, management and enhancement of designated blue and green infrastructure sites and assets. With a focus on the Green Network (including the Local Nature Recovery Network) and designated Urban Greenspace Zones”

Suggest changing to:

- “1) Protection, management and enhancement of blue and green infrastructure sites and assets including designated sites and Urban Greenspace Zones (see Map 17, policies map and policies GS1 to GS11) and the creation of new assets, especially where provision is low”
- Change the name of Map 17 to Blue and Green Infrastructure as it is not a network and may be confused with the nature recovery network– make the blue infrastructure clearer (waterways are not showing up as they are also LWS) and add opportunity sites.

add new para as follows:

- Identification, protection, enhancement and restoration of ecological networks: the Local Nature Recovery Network in line with the Local Nature Recovery Strategy/Nature Emergency Action Plan (GS5)

If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s):

Yes, I wish to participate in hearing session(s)

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Representation

Do you consider the Local Plan is legally compliant: Yes

Do you consider the Local Plan is sound: Yes

Do you consider the Local Plan complies with the duty to co-operate: Yes

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to co-operate:

We fully support the fact that the site adjacent to J33 (on the west) of the M1 known as Smithy Wood has not been allocated for development. SRWT, along with many other local people and organisations spent 7 years protecting the site from an inappropriate development proposal for a Motorway Service Area, despite the site being in green belt and designated as a Local Wildlife Site due to its ancient woodland habitats <https://www.wildsheffield.com/campaign/smithy-wood/>
We support the decision to include assign 'Land Adjacent 137 Main Road Wharncliffe Side Sheffield' ' in Wharncliffe Side (see recent application: 22/00865/FUL) to the category Urban Green Space Zone rather than be allocated for development.

We support the decision not to allocate the Hepworth site in Loxley (subject of Appeal APP/J4423/W/20/3262600) for development, instead retaining it in the Green Belt.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above:

Blue and Green Infrastructure

“5.24 Sheffield’s blue and green infrastructure is important at all scales and is represented on Map 17”.

Unsound. As previously commented – Map 17 does not show Blue & Green Infrastructure

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above:

For the reasons outlined in Part 1, SPD1, we suggest the following minor modifications

Suggest adding “and the Nature Recovery Network” to the title of the policy
Suggest changing: ‘Very significant weight will be given to the protection and enhancement of Sheffield’s Green Network of urban greenspace and countryside (including the Local Nature Recovery Network) especially,..’

to:

”Very significant weight will be given to the protection and enhancement of Sheffield’s Blue and Green Infrastructure and Local Nature Recovery Network, especially...”

Suggest addition “Valuable greenspaces will be protected from inappropriate built development and are shown on the Policies Map as either Urban Green Space Zones (policy GS1), Greenbelt (GS2) or designated ecological or geological sites (GS5)”

Suggest addition ‘New high quality green infrastructure that meets standards* is encouraged’ *Such as Building with Nature <https://www.buildingwithnature.org.uk/>

N/A

Representation

Do you consider the Local Plan is legally compliant: Yes

Do you consider the Local Plan is sound: No

Do you consider the Local Plan complies with the duty to co-operate: Yes

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to co-operate:

8.1 "Sheffield declared a Biodiversity Emergency in May 2021"

"8.3 Policy BG1 identifies the important green and blue infrastructure in the city. The policies in this section set out how these important features will be protected and enhanced as part of new development

8.4 The implementation of other local and national strategies will also help to address the loss of nature and help create, restore and connect a range of habitats to provide a network of places for wildlife to thrive."

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above:

8.1 The wording in the motion passed by Sheffield Council in June 2021 was that the Council “declares a nature emergency”

Suggest minor amendment:

8.4 The implementation of BG1 alongside other local and national policies and strategies will also help to address the loss of nature and help create, restore and connect a range of habitats to provide a network of places for wildlife to thrive.”

If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s):

Yes, I wish to participate in hearing session(s)

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

The motion passed by SCC was the result of work by SRWT and others

Representation on the Sheffield Plan Publication (Pre-Submission) Draft

Respondent details

Comment ID number: PDSP.127.010

What is your Name: Sheffield and Rotherham Wildlife Trust

If you are making this representation as a member of an organisation, what is the name of your organisation:

Policy GS1: Development in Urban Green Space Zones

Which paragraph/site/map layer of the document is representation on:

N/A

Representation

Do you consider the Local Plan is legally compliant: Yes

Do you consider the Local Plan is sound: No

Do you consider the Local Plan complies with the duty to co-operate: Yes

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to co-operate:

We support this policy but note that

“In Urban Greenspace Zones, development should:

b) not cause or increase a break in the city’s network of blue and green infrastructure”

As previously described in our response to Part1 – there is no clear blue and green infrastructure network in either map or strategy form.

Table 4. Standards for Assessing the Quantity of and Access to Information

Greenspace and Outdoor Sports Areas

Refers lists ‘Access Standards’ but it is very unclear for the reader where this list has come from. Only by delving into the Supporting Evidence ‘Sheffield Open Space

Assessment 2022' where it is clear that the consultant report has identified that Sheffield does not meet the Natural England Accessible Greenspace Standards (ANGST) e.g. see Section 7.3.2 and Figures 12-14 in the Assessment. Instead of taking steps to address these gaps in provision in the allocation map or policies, a lower standard of 15minute walk time to an accessible natural greenspace has been suggested in the Assessment. There is no explanation of this in Part2 and no strategic policies to address the gaps identified by both ANGST and this locally suggested lower standards (Figure 11). As previously mentioned there are also gaps in provision identified by the 'Access to Nature – capacity and demand maps' which were developed as part of the South Yorkshire Natural Capital Maps ('Holt, A.R., Zini, V. & Ashby, M. (2021) South Yorkshire natural capital and biodiversity mapping, Natural Capital Solutions Ltd, July 2021'). This is the most up to date and best quality evidence we have for access to nature and it not referenced.

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above:

The South Yorkshire 'Access to Nature – capacity and demand maps' and the Natural England GI Framework should be used to identify GI gaps and opportunities as a GI layer on the interactive spatial maps

If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s):

Yes, I wish to participate in hearing session(s)

Representation

Do you consider the Local Plan is legally compliant: Yes

Do you consider the Local Plan is sound: No

Do you consider the Local Plan complies with the duty to co-operate: Yes

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to co-operate:

We support the supporting text.

Lack of clarity of the wording in e) to 'prevent the loss of locally and nationally vulnerable species, instead creating opportunities for them to recover and thrive; and' .

In the associated Definitions section there is no explanation of where a list of locally and nationally vulnerable species can be found.

Although examples of design features to enhance biodiversity (including 'swift bricks') are given in the 'Definitions' box beneath, there is no clear expectation of the extent to which these will be required. For example, several UK Red list bird species – swifts, house sparrow, startling and house martins can benefit from the inclusion of

cheap swift bricks in all new builds. Integrated bat tiles or bricks are also very affordable and should be standard.

Justification NPPF para179 "Plans should" b) "...and the protection and recovery of priority species"

www.gov.uk/guidance/natural-environment#green-infrastructure

Paragraph 023 Reference ID: 8-023-20190721)

www.gov.uk/guidance/natural-environment#biodiversity-geodiversity-and-ecosystems

Paragraph: 012 Reference ID: 8-012-20190721

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above:

'Where relevant, development should'

Replace with 'where relevant, developments are required to'

b) And j) Addition 'in line with the South Yorkshire Local Nature Recovery Strategy/Sheffield Nature Emergency Action Plan'

e) Suggest changing to:

'Prevent the loss of, and include enhancements for, the recovery of important species (see definition); specifically

- amended to specifically state that all new dwellings and other new buildings should include at least one integrated swift brick (or other bird roosting opportunity), with at least 50% of new dwellings to include one integrated bat box/bricks/tile, and that larger buildings (schools, industrial buildings, hospitals etc.) should have at least 10 features.

- Hedgehog holes/passageways must to be included in all linear barriers in new developments as standard practice unless there is good reason not to do so (e.g. flood defence)

- riparian development should include enhancement for riparian species (including bats, otter, kingfisher) depending on how close the development is (due to buffers)

-

Suggest amendment to l) (and or the definition of Design features to enhance biodiversity): Design features to enhance biodiversity and create opportunities for species could include green and brown roofs, street trees, native shrubs, hedgerows and wildflowers, bird boxes or platforms, swift bricks, bat boxes, bat bricks or tiles, hedgehog holes...

Suggested amendment to definition

'Important or protected habitats or species' – includes protected species, priority habitats and species, and significant populations or collections of national or local importance, or nationally scarce species including those identified in the South Yorkshire Local Nature Recovery Strategy and/or Sheffield Nature Emergency Action Plan'

Justification

The following respected organisations recommend a ratio of one swift nesting provision per dwelling:

- o RIBA - 2nd edition Design for Biodiversity

o BS42021 Integral nest boxes - Selection and installation for new developments which was published on 29th March 2022

There are also examples of Local Planning Authorities requiring that all new dwellings include bird and/or bat boxes. For example Greater Cambridge and Leeds Council

Suggested clarification (swap wording round for clarity)

k) provide appropriate buffer-strips for priority habitats and designated sites

Suggested amendment to definition of buffer zones – currently too weak and not in line with allocated site conditions

‘Appropriate buffer-strips – where buffers are required to protect priority habitats, designated sites and/or protected species the following buffers should be applied unless there are good reasons why these are not feasible- 20m for main rivers (10m minimum if not feasible), 10m for ordinary watercourses (5m minimum if not feasible), grasslands (6m min), ancient woodland (15m min) ancient or veteran trees (see Govt standing advice ancient woodland, ancient and veteran trees standing advice <https://www.gov.uk/guidance/ancient-woodland-ancient-trees-and-veteran-trees-advice-for-making-planning-decisions>)

If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s):

Yes, I wish to participate in hearing session(s)

Representation on the Sheffield Plan Publication (Pre-Submission) Draft

Respondent details

Comment ID number: PDSP.127.012

What is your Name: Sheffield and Rotherham Wildlife Trust

If you are making this representation as a member of an organisation, what is the name of your organisation:

Sheffield and Rotherham Wildlife Trust

If you or your organisation are making a representation on behalf of another person, organisation or group, please tell us who it is and its role:

N/A

Document

Which document to you wish to make a representation on:

Part 2: Development Management Policies and Implementation

Which section of the document is your representation on:

Policy GS6: Biodiversity Net Gain

Which paragraph/site/map layer of the document is representation on:

N/A

Representation

Do you consider the Local Plan is legally compliant: Yes

Do you consider the Local Plan is sound: No

Do you consider the Local Plan complies with the duty to co-operate: Yes

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to co-operate:

8.24 -8.26 Good supporting text but a minor clarification is required to say explain which developments BNG applies to (or not).

GS6 Biodiversity Net Gain

An addition to this policy or supporting text is needed to avoid risks of site clearance before baseline BNG which we know is a growing problem across the country (and developers are more likely to see the relevant wording in a Local Plan than in the Environment Act).

The Wildlife Trusts welcome the mandatory requirement for a minimum of 10% Biodiversity Net Gain as a first step but, in the context of the nature crisis and need

to support nature's recovery of 30% of land great for nature by 2030, we believe that development should look to deliver at least 20% biodiversity gain where possible. The Whole Plan Viability Assessment included biodiversity net gain and the SCC Planners have said that this assessment does not allow for a higher than 10% BNG Policy. However, sections 8.80-8.86 of the Viability Assessment does not clearly state that more than 10% would present a viability problem, it actually says most of the costs are in the surveys. We therefore recommend that Sheffield City Council alter the policy to encourage 20% as best practice where feasible (including where financially viable) over and above the minimum 10%.

Reference. Within the evidence presented by Defra consulting on the introduction of Biodiversity Net Gain into the planning system (December 2018-February 2019), it was made clear that an increase of 10% would be the absolute minimum necessary to ensure confidence that a net loss in biodiversity would be avoided, and that any gain would actually be realised as an outcome of a development-related biodiversity 'enhancement' project. Relevant findings from Defra's Impact Assessment document (

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/839610/net-gain-ia.pdf 21/11/2018) include:

- “..In simple terms, [10%] is the lowest level of net gain that [Defra] could confidently expect to deliver genuine net gain, or at least no net loss, of biodiversity and thereby meet its policy objectives.”
- “..Advice from some Natural Capital Committee members suggests that a level of net gain at or above 10% is necessary to give reasonable confidence in halting biodiversity losses.”
- “..The department therefore favours as high a level of net gain as is feasible... The analysis undertaken in this Impact Assessment indicates that the level of requirement makes relatively little difference to the costs of mitigating and compensating for impacts.”

Other Local Authorities are also considering implementing or advising more than 10% net gain e.g.

<https://cieem.net/kent-assesses-20-biodiversity-net-gain-requirement/>

<https://kentnature.org.uk/nature-recovery/biodiversity-net-gain/>

<https://www.planningresource.co.uk/article/1788418/nine-authorities-set-require-developers-provide-biodiversity-net-gain-ten-per-cent>

If our recommended modification below is not accepted, then we would like to see the retention of the existing draft policy wording

“BNG in excess of 10% may be required where:

- there is a particular ecological need in that location based on evidence in a biodiversity/nature recovery action plan or as part of the Local Nature Recovery Network mapping, or
- there is evidence of rare/protected species within, or close to, the development site; or
- the site starts with very low or nil existing biodiversity value”

A suggested mechanism to assist with the 3rd bullet point could be that Urban Greening Factor outlined in policy G5 of The London Plan (2021) from p322

https://www.london.gov.uk/sites/default/files/the_london_plan_2021.pdf

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above:

Suggest minor modifications to GS6

Change this “This will be a minimum of 10% gain from pre to post development and must be achieved for all habitat types evident on site. BNG in excess of 10% may be required where”

To

“A best practice of 20% gain from pre to post development is encouraged where possible, over and above the statutory minimum requirement of 10% which must be achieved for all habitat types evident on site. BNG in excess of 10% is likely to be required for example where”

Minor addition added to the end of b) as follows:

“b) deliver BNG on-site through habitat retention, enhancement and creation but, where it is clearly justified that this is not possible, deliver BNG offsite on sites identified in the Local Nature Recovery Strategy as having particular potential for habitat creation or enhancement (with priority given to areas closest to the site and/or including in some cases local planning authority boundary working); and”

Justification

Landscape-scale nature recovery and opportunities so not always align with Local Planning Authority boundaries – for example the Rother Valley is cross-border into Rotherham and a large area of Sheffield falls within the Peak District National Park Local Planning Authority which may provide opportunities for off-site compensation.

Minor clarification needed

“BNG will not be applied to designated sites or irreplaceable habitats; any impacts on such habitats and sites will be assessed in accordance with planning policy and appropriate environmental assessments, with any necessary mitigation and/or compensation requirements dealt with separately from BNG provision.”

It is unclear if this applies to impacts only or compensation (details of which may come in a SDP following further Govt guidance).

Suggest changing to

“The Defra BNG metric cannot be used to measure impacts on statutorily designated sites or irreplaceable habitats and BNG should not be used to justify damage from development to Local Wildlife Sites. Any impacts on such habitats and sites will be assessed in accordance with planning policy and appropriate environmental assessments, with any necessary mitigation and/or compensation requirements dealt with separately from BNG provision.”

Suggested additions to supporting text or policy

“The Environment Act 2021 requires that ‘information about the steps taken or to be taken to minimise the adverse effect of the development on the biodiversity of the onsite habitat and any other habitat’ is included in the biodiversity gain plan.

Sites should not be cleared or substantially altered before the baseline BNG is measured. Within Schedule 14 of the Environment Act, measures are included that allow planning authorities to recognise any habitat degradation since 30th January 2020 and to take the earlier habitat state as the baseline for the purposes of biodiversity net gain.

The baseline value reflects the ecological value of the pre-development site, not its size, a small site may still have value. If a site has a baseline biodiversity unit value

of zero, then SCC may agree the appropriate number of units on a site by site basis (rather than a percentage).

Further details on how BNG will be implemented will be provided in a Supplementary Planning Document once Secondary Legislation and Guidance has been published in 2023.”

If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s):

Yes, I wish to participate in hearing session(s)

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Expert opinion

Representation on the Sheffield Plan Publication (Pre-Submission) Draft

Respondent details

Comment ID number: PDSP.127.013

What is your Name: Sheffield and Rotherham Wildlife Trust

If you are making this representation as a member of an organisation, what is the name of your organisation:

N/A

Document

Which document to you wish to make a representation on:

Part 2: Development Management Policies and Implementation

Which section of the document is your representation on:

Policy GS7: Trees, Woodland and Hedgerows

Which paragraph/site/map layer of the document is representation on:

N/A

Representation

Do you consider the Local Plan is legally compliant: Yes

Do you consider the Local Plan is sound: No

Do you consider the Local Plan complies with the duty to co-operate: Yes

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to co-operate:

We suggest a number of minor clarifications or amendments to ensure alignment with current best practice, guidance and terminology

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above:

Suggested minor amendments

8.27 Sheffield's trees, woodlands and hedgerows and an important part of the city's green infrastructure and character. They form an important part of the city's distinctive townscape and provide a setting for relaxation and community activity.

Trees and woodlands also play an important role in the biodiversity of the city, mitigating climate change, air quality, traffic calming, wellbeing and managing flood risk.

Suggested addition of another supportive text paragraph

“8.29 Tree planting and woodland creation should be planned and follow recognised good practice and contribute to the delivery of relevant plans and strategies held by SCC or in the wider region such as South Yorkshire wide. Such strategies will relate to tree planting and woodland creation as well as the benefits they provide; natural flood management, nature recovery strategies and climate change mitigation. Strategies include the Sheffield Street Tree Strategy, the Sheffield Woodland Strategy and the South Yorkshire Woodland Creation Plan.”

Policy GS7

We support this policy and suggest some minor amendments

b) Needs to refer to the Govt Standing Advice on this subject

<https://www.gov.uk/guidance/ancient-woodland-ancient-trees-and-veteran-trees-advice-for-making-planning-decisions>

Add in a paragraph about consequences if trees are removed prior to planning application and whether the consequences would differ for ancient or veteran trees or hedgerows to support b).

Suggested minor addition

“If trees are removed prior to a baseline ecological assessment/planning application then it will assumed that trees were of a very good condition and compensation will be required on that basis.”

Suggested minor amendment

“c) Where existing trees are within or immediately adjacent to a development site, development proposals should give priority to retaining good quality condition trees and ensure that trees are adequately protected during the demolition and/or construction phases of the development”

Also suggest minor amendment in definitions to be in line with standard industry terminology

“Good quality trees’ identified in the tree survey as being of high or moderate value and capable of making a significant contribution to the area for 20 or more years”

Change to:

“Good condition or high heritage value trees” – identified in the tree survey as being of high or moderate condition (Categories A&B) and capable of making a significant contribution to the area for 20 or more years and/or have a significant heritage value.

“f) Locally native species of local origin should be used and, where appropriate reflect similar habitat(s) of ecological importance and not conflict with other important habitats, natural features or archaeological remains”

Suggest minor amendment

“f) Trees and Shrub species should be selected as being appropriate for the situation they are planted in; complementary to existing and planned habitat creation. First choice should be native broadleaved species and selection should be made to ensure that species planted will thrive in current conditions as well as those modelled in the future climate change scenarios. Species mixture and planting design to be maximise resilience to potential pests, diseases and pathogens that may be encountered as well as maximise benefit to wildlife and people and following the principle of right tree in the right place.”

Followed by suggested additional paragraph (to distinguish that it is different for street trees)

“Street trees should be chosen in line with current guidance from the Sheffield Street Tree Partnership”

“h) Appropriate provision should be made for ongoing management of any trees, woodland and hedgerows that have been planted and appropriate measures should be put in place to minimise the risk of trees failing.”

Suggest minor amendment

“h) Appropriate provision should be made for ongoing management of any trees, woodland and hedgerows that have been planted and appropriate measures should be put in place to minimise the risk of trees failing, including adequate watering or urban/street trees. Trees that fail in the first five years should be replaced and relevant protective materials should be removed to ensure unrestricted growth and survival. Management (including resources) should provide for a 20% replacement if required.”

If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s):

No, I do not wish to participate in hearing session(s)

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

N/A

Representation on the Sheffield Plan Publication (Pre-Submission) Draft

Respondent details

Comment ID number: PDSP.127.014

What is your Name: Sheffield and Rotherham Wildlife Trust

If you are making this representation as a member of an organisation, what is the name of your organisation:

Sheffield and Rotherham Wildlife Trust

Which document to you wish to make a representation on:

Part 2: Development Management Policies and Implementation

Which section of the document is your representation on:

Policy GS9: Managing Flood Risk

Which paragraph/site/map layer of the document is representation on:

N/A

Representation

Do you consider the Local Plan is legally compliant: Yes

Do you consider the Local Plan is sound: No

Do you consider the Local Plan complies with the duty to co-operate: Yes

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to co-operate:

8.30 "In Sheffield, the risk of flooding comes from both rivers and surface water. Managing the risks is one of the most important ways of adapting to a pattern of more intensive rainfall events that is predicted as a result of man-made climate change and global warming."

Unsound - lack of clarity

Clarification needed on terminology as Surface Water in EA/WFD terms means, rivers, ponds lakes and transitional water not rainfall on hard surfaces as implied here.

8.31 "It is vital that development slows water from entering the main river systems and that sensitive uses are not developed in the areas with the highest risk of

flooding. But where development does take place in areas at risk of flooding it must implement a range of mitigation measures to reduce the extent and impact of flooding.”

Unsound –Compliance to national guidance. The objective of this procedure is to assist developers and their designers to conform to NPPF paras 164b) and 167. Sustainable drainage is the suggested approach to managing flood risk resulting from surface water runoff from the site.

<https://www.gov.uk/government/news/new-approach-to-sustainable-drainage-set-to-reduce-flood-risk-and-clean-up-rivers>

<https://www.gov.uk/government/publications/sustainable-drainage-systems-review>

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/7728/pavingfrontgardens.pdf

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/7728/pavingfrontgardens.pdf

Separate out slowing the flow from developments and avoiding areas of high flood risk into two separate points. Tributaries feed into the ‘main rivers’ and need to be explicitly included, plus slowing all drainage needs to be included to avoid complete hard surfacing and drainage of some areas. Important to get sewers/drainage systems in to address the Combined Sewer Overflow (CSO)s risk, especially if more development is being linked to the network.

Policy GS9: Managing Flood Risk

Flood Risk Management for Development Sites

“New Development will be permitted where...

a) Is set back from any watercourse (and/or any flood defences on the site) to allow for future maintenance and biodiversity:

- For Main Rivers as agreed with the Environment Agency but a minimum 8m from top of the bank and any flood defences on the site) either side
- For ordinary watercourses as agreed with the LLFA but a minimum of 3m from top of the bank (and any flood defences on the site) either side; and

Unsound - All main Rivers in Sheffield are key ecological corridors and are designated as Local Wildlife Sites so should be adequately protected and buffered.

NPPF 174b) “minimising impacts on and providing net gains for biodiversity, including by establishing ecological networks that are more resilient to current and future pressures’ and 174e “preventing new and existing development from contributing to, being put at unacceptable risk from, or being adversely affected by, unacceptable levels of soil, air, water or noise pollution or land instability.

Development should, wherever possible, help to improve local environmental conditions such as air and water quality, taking into account relevant information such as river basin

management plans” Suggest 8m is too little to ensure this based on the Environment Agency response in relation to a Planning Appeal for a site in the Loxley Valley in Sheffield (Appeal APP/J4423/W/20/3262600) where the Environment Agency stated “a minimum undeveloped 10 metre wide buffer zone alongside the River Loxley..... The buffer zone scheme shall be free from built development including lighting, domestic gardens and formal landscaping”

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above:

Suggest minor modification to wording as follows:

8.31 “It is vital that development slows water where attenuation of the of the development area is to be altered/increased to ensure that water is slowed from entering the main rivers and their tributaries.”

“It is vital that sensitive uses are not developed in the areas with the highest risk of flooding”. But where development does take place in areas at risk of flooding it must implement a range of mitigation measures to reduce the extent and impact of flooding.” Remove this section as it is incompatible with GS9 a)-e) Include position on Flood Zones 1 and 2 here or in GS9.

Suggested amendments to wording on buffers

Increase buffer to 20m where feasible (minimum 10m if not feasible) for main rivers and 10m (minimum 5m if not feasible) for ordinary watercourses. This would also be in line with several of the site specific conditions in this draft.

Guidance/policy needed about demolition and replacement or redevelopment of existing buildings which currently do not have a buffer to the river. Suggested addition on policy point

“For sites containing buildings with a smaller buffer to the rivers – replacement buildings should be set back as per this policy. This will not apply to refurbishing buildings of heritage value.”

“c) minimised culverting and no building over open watercourses wherever practicable; and

weak wording - Suggest replacing with “Avoids culverting of and building over open watercourses including ephemeral watercourses, and avoid changing groundwater pathways”.

Add in “Overland water should be retained on the same flowpath after development and not diverted into the drainage and sewer network”

If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s):

No, I do not wish to participate in hearing session(s)

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to co-operate:

I am actually trying to comments on NWS29 but this was not an option on the drop down list (NWS26 was listed twice instead). The Local Wildlife Site area should be removed form the red linen boundary to be clear that this is not for development and to be compatible with the LWS policies

Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified above:

remove Parkwood Springs LWS from red line boundary as incompatible with LWS policies

If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s):

Yes, I wish to participate in hearing session(s)

If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Not completed by respondent
