**Date:** 11 January 2023 14:55:07

---

Dear Team

Having read through the draft plan "Our City, Our Future" I wish to support the thrust of the proposals.

It is particularly good to note that the following factors have been recognised as priorities:-

- Climate change mitigation - must be the very top priority.
- New development on brownfield sites and preservation of the green belt.
- Sustainable, efficient transport links.
- Support of active travel, eg cycling, walking, etc.
- Top quality housing which is energy efficient and with the "20 minute plan" for accessing local facilities.
- The need to ensure local infrastructure such as schools and health facilities.
- The need to provide opportunities for innovative business development and industry in appropriate locations.

One detail that may be covered, but if so I have missed it, is the need to improve access and public transport to the the two major hospitals in the city, ie Northern General and Royal Hallamshire.

Dr Richard Worth
